

ANTISTATIC PAPER**I. Description**

STATIC TECH's antistatic paper is ideal for use in areas where static generation and electrostatic discharge must be controlled. The paper has both antistatic (low tribogeneration) and static dissipative properties. Antistatic paper is useful as a replacement for conventional paper stock for general documentation. It can also be used as an antistatic liner. The low tribogenerative properties (less than 200V) makes this particularly useful as paperwork attached to PC boards.

STATIC TECH antistatic paper has a light pink stripe on the side to identify it as an ESD control material. This paper is available in reams of 8.5" x 11" sheets.

All statements, technical information and recommendations related to the seller's products are based on information believed to be reliable, but the accuracy or completeness thereof is not guaranteed. Before using the product, the user should determine the suitability of the product for its intended use. The user assumes all risks and liability whatsoever in connection with such use.

II. Specifications

Charge Generation: Less than 200V at 50% RH

Color: White with light pink identification stripe

Resistivity: Typical less than 9×10^6 ohms at 50% RH, less than 9×10^9 ohms at 20% RH

Weight: 20 lb.

III. Part Number:

DP-8510 8.5" x 11" Paper Ream

Note: 1 ream = 500 sheets
