

DISPOSABLE HEEL GROUNDER**I. Description**

Static Technologies MG-1000 disposable heel grounders provide a convenient and effective means of grounding personnel in ESD sensitive areas. These grounders provide up to eight hours of protection, making them ideal for use by visitors. The MG-1000 design provides superior conductive contact and remains securely on the shoe. Sold in packs of fifty grounding strips.

II. Specifications

Material: Compressed yellow cellulose material with conductive ink and peel-off adhesive strip

Resistance: Less than 1×10^6 ohms per linear foot

Size: 9/16" x 11-3/4"

Sold one hundred pieces per pack.

Note: Use two foot grounders for effective ESD protection.

III. Use Instructions

1. Brush loose dirt and debris from bottom of shoe heel.

2. Line up adhesive end of grounding strip with forward portion of shoe heel.

3. Peel off enough adhesive so that strip will adhere to the bottom of the heel. Do not peel off more adhesive than is necessary to extend across bottom of shoe heel.

4. Press adhesive against bottom of heel.

5. Bring strip up along back of shoe and place the end inside with black stripe facing up. the strip should extend as far forward as possible to ensure good contact with the users heel.

6. Repeat for other foot.
